## **ABA Workplace Transport Groupings - MEWPS**

At the last meeting of the ABA it was felt that due to the number of questions raised by Training Providers that clarification of the MEWP groupings was required.

1A – Rider Electric and ICE – Static Vertical – This machine can be driven into position but cannot be moved when the carrier is elevated.

1B – Rider and Pedestrian Electric and ICE – Static Boom - This machine can be driven into position but cannot be moved when the carrier is elevated.

3A – Rider – Electric and ICE – Mobile Vertical – This machine can be driven into position and driven when the carrier is elevated.

3B – Rider – Electric and ICE – Mobile Boom - This machine can be driven into position and driven when the carrier is elevated.
